I. Course Summary Descriptions

Finance

MindEdge's Finance certificate and coursework guide learners to organize and interpret the financial health of a business. From budgeting, the time value of money, risk, and ROI, learners gain the ability to read financial data and turn those insights into impactful decisions that move the business forward.

Certificate in Finance Essentials

This online certificate program introduces non-financial managers to the essentials of finance. The courses will help you become conversant in critical financial terminology, and you'll learn how to calculate key financial management indicators. You will learn how to assess your organization's financial health by reviewing balance sheets, income statements, and statements of cash flow, and you will discover how finance and accounting tools can be used to support informed decision making within organizations.

How to Read a Financial Statement

Financial statements can look intimidating and, as a non-financial manager, you may feel like ascertaining the right conclusion from a financial statement is like finding a needle in a haystack. This course covers financial reports and their meaning. You will learn the fundamentals and importance of the income statement, balance sheet, and statement of cash flows, and how they can be used to manage a business. You will also be exposed to financial (ratio) analysis.

Introduction to Business Statistics

Statistics is the science of collecting, organizing, and analyzing data in order to make more effective decisions. As such, statistics is critical to a successful business. This introductory-level course is meant for non-financial managers. Understanding statistical techniques can help any manager responsible for marketing, management, accounting, sales, or other business functions. This course will also cover graphical representations of data that your stakeholders may expect when reviewing the results of any statistical analysis.

Credits: 0.4 CEUs

Introduction to Finance

Understanding basic finance is important for any managerial position, even non-financial managers. This introductory-level course starts at the beginning, discussing finance as an organizational setting and legal forms of business. The course continues on to cover the responsibilities of financial managers, roles of finance in a typical business organization, and relevant financial markets of interest to financial managers. Further, the course will discuss corporate financing and the role the stock market plays in the business world.

Credits: 0.3 CEUs

Time Value of Money and Risk

Is a dollar more valuable today or tomorrow? What about a year from now? This introductory-level course covers time value of money (TVM) principles and risk and return. You will review the basic TVM techniques used in evaluating all financial decisions and their cash flow implications. For Risk and Return, you will learn how risk influences investment decisions, and how to calculate risk and rates of return. Further, you will explore the benefits of diversification and the use of the portfolio concept in investing.
