Why Security Awareness Training?

Nothing is worse than clicking on a link in an email that you thought was from a friend or colleague, only to find out you fell victim to a phishing attack. Suddenly, your computer is infected with a virus, and you spend the next few hours of your life anxiously waiting to see if IT can save your files.
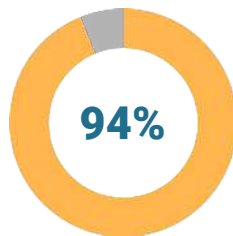

The best way to protect against viruses, phishing attacks, and malware, is to know how to identify the risks. When you know what to look for and avoid, you lower your chances of getting a computer virus.
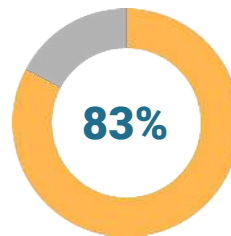

## Learners agree that our online courses:

Are Effective	Meet Learning Objectives	Had a positive effect on their career/life	Worth Recommending to a Friend
90%	94%	83%	96.5%
