I. Course Summary Descriptions

Security Awareness

Employee education is the best firewall. Having a security breach can cause irreparable damage to your reputation and your business. MindEdge's Security Awareness Training covers how to address common security challenges like phishing attacks, remote staff security, password protection, mobile device use, social media usage, and response and recovery plans.

Security Awareness Training

MindEdge's Security Awareness Online Training teaches employees to identify and prevent security breaches before they happen. For four cents per day per employee, your staff will have year-long, anytime, anywhere access to our highly-rated online security awareness training. This comprehensive training spans the facets of security awareness from in-office to remote security, email to phishing attacks, malware to ransomware, cloud to social media, and more.
