I. Course Summary Descriptions

Agile

These days, project management is multidimensional depending on the project, industry, and team. MindEdge's Agile program of coursework teaches the principles Agile Project Management, an iterative, skinnied-down approach to project management for teams that must move quickly. Add this approach to your project management toolbox to be even more marketable to businesses and valued within your organization.

Agile Project Management (ACE CREDIT®)

This online course introduces learners to Agile methods of project management. Beginning with an introduction to the core philosophy of Agile and the basic structure of an Agile project, the following modules address specific challenges that may be encountered by teams using Agile, best practices for integrating Agile methods into Waterfall environments, and the principles of Scrum, one of several specialized Agile methods. The self-paced course offers an assortment of interactive exercises, videos, selected readings, case studies, and self-assessments that engage students and provide opportunities to practice their project management skills in an Agile context.

Certificate in Agile Project Management

Agile project management practices have become the standard for software development projects. More recently, Agile has grown beyond software projects as more and more companies adopt Agile concepts and methodologies. Individuals who have a solid understanding of Agile have a distinct advantage in today's changing project management atmosphere. The courses included in this certificate program will provide managers the basic foundation they need to become competent Agile practitioners. The program introduces the learner to the basic methodologies, practices, and key concepts of Agile and enables the learner to explore, through case studies, many of the common challenges of working on an Agile team.

Agile Improvement Simulation: SaaSy Corporation

In this simulation, you'll assume the role of an Agile coach hired to help refine an organization's transformation. The simulation, designed for adult learners with some Agile experience, will ask you to make decisions as you confront common Agile issues. Each decision you make will include tradeoffs that will increase satisfaction in some areas but may hinder other areas. Your task will be to select an option that best benefits your organization.

As you make your choices, an adaptive scoreboard will reflect the impact of those choices on organizational success. Your goal will be to optimize your score across several organizational factors. You'll use the results of your actions to inform subsequent decisions as you complete the simulation.

Agile Project Management Final Exam (ACE CREDIT®)

This is the final exam course for this ACE CREDIT®-bearing bundle.

Estimated length: 2 hours

Access Time: 90 days

Credits: 2 ACEs

Agile Project Management Introduction Course (ACE CREDIT®)

This course introduces the learner to the topics covered in this course bundle, as well as the process for earning ACE CREDIT®.

Estimated length: 1 hours

Access Time: 90 days

Challenges for Agile Teams

This intermediate-level course is designed to help Agile practitioners decipher and solve the problems that arise regularly in their work. The course begins with 16 video segments from seasoned Agile trainers and practitioners who provide tips and best practices for addressing Agile team challenges. The course then presents 20 short case studies that test the student's understanding of Agile practices and provide guidance for resolving common problems. The case studies are structured to simulate the conversations and interactions that happen regularly on Agile projects; seeing these disputes as narratives will help students learn to deconstruct issues and diagnose the underlying problems that need to be corrected, just as they would in their everyday work. As students decode these disputes and plan appropriate responses, they'll gain the experience they need to guide their teams and to put them back on track to deliver value to their customers..

Access Time: 90 days

Credits: 0.5 IACET CEUs / 5 PMI PDUs

Integrating Agile Into a Waterfall Environment

This intermediate-level course is designed to help Agile practitioners recognize and resolve many of the common issues that emerge when Agile concepts are introduced into Waterfall organizations. The course begins with 24 video segments from seasoned Agile trainers and practitioners who provide tips and best practices for addressing integration obstacles. The course then presents 20 short case studies that simulate the communication and interchanges that can occur as Agile and Waterfall practitioners work to resolve differences in the ways that they see and execute tasks. As students evaluate these case studies, they'll learn to deconstruct and diagnose any underlying problems that need to be resolved, just as they would in everyday practice. While they work to decode and correct these issues, they'll begin to recognize the common pitfalls that can happen as project teams collaborate and interact.

II. Testimonials

The following testimonials are provided by learners that have completed courses in the Agile suite.

Agile Certified Practitioner (PMI-ACP)® Exam Prep

"After over 20 years practicing and studying project management, this is by far the best course I've attended."

Agile Certified Practitioner (PMI-ACP)® Practice Exams & Exam Strategies

"A very great course to pursue. I unreservedly recommend."

Challenges for Agile Teams

"This was a really good introductory course for Agile. I retained the information throughout because of the relevance and reinforcement of concepts in mini-cases."

Integrating Agile Into a Waterfall Environment

"Minicases were very helpful to understand how Agile can be used in different areas. Minicases and assessment helped to put terminology in right context."

Introduction to Agile

"Being a product owner on a few projects and Scrum Master on a few projects, this training helped me refresh my knowledge on best practices to follow in Agile teams."

Principles of Scrum

"I like the various ways of checking knowledge and understanding of the course material."
